Problem solving - case study 01

Smart companies are **solving the problem** with AiVATAR.

News PD

#Lower carbon emissions

#cost savings

#Enhance Work Efficiency

Since the introduction of AI avatars into the news producing system, **costs have decreased by up to 90%**. Additionally, **worker effectiveness has increased** as their scope of work has expanded to include other creative tasks.

Problem solving - case study 02

Smart companies are **solving the problem** with AiVATAR.

Head of Foreign
Language Business Unit

#Lower carbon emissions

#cost savings

#Bridging the Education Gap

When producing **educational content in multiple languages**, there is no need to hire and record instructors for each language. Simply **inputting text in each language** can generate a large amount of content quickly, making it **more accessible to a wider range of customers**.

Problem solving - case study 03

Smart companies are **solving the problem** with AiVATAR.

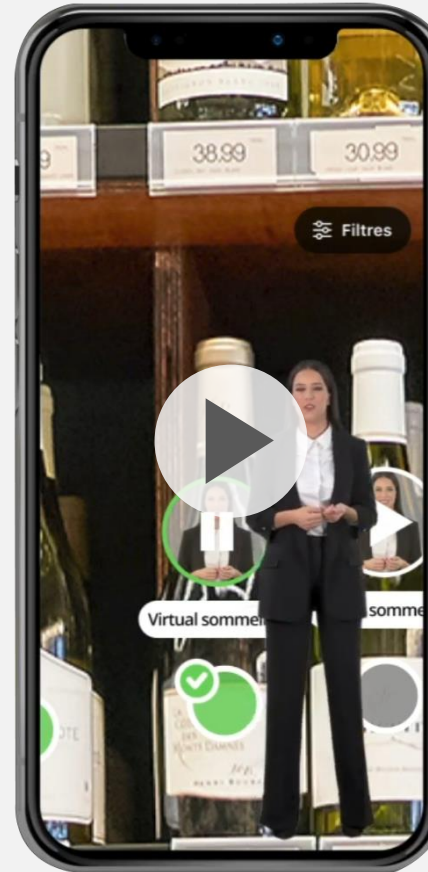

Co-founder

Graffiti

#Enhance Customers' Experience

#Enhance work efficiency

The **vaguely thought 'AR service'** can be used in practice. By using AiVATAR to provide product information, **customer access to information has expanded.**

Problem solving - case study 04

Smart companies are **solving the problem** with AiVATAR.

Thermal Power
Management Team Leader

#Supports digital transformation

#Enhance work efficiency

Regardless of the various human conditions that guide the facility, with AiVATAR, we can now provide **consistent multilingual messages** to all visitors without the need to hire a separate interpreter.

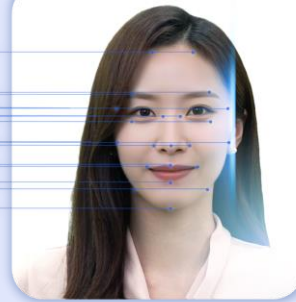

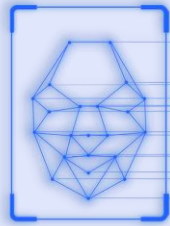

AiVATAR Strength

AiVATAR embodies **naturalness through robust AI technology.**

High-quality data

Generate high-quality video with training on tens of thousands of voice and face data. AiVATAR has learned characters from various continents, allowing you to choose ethnicity avatars.

Free from Portrait Right

The result is less disjointed and avoids any legal issues related to portrait rights, as it is created by synthesising and recreating real people's faces instead of using graphics.

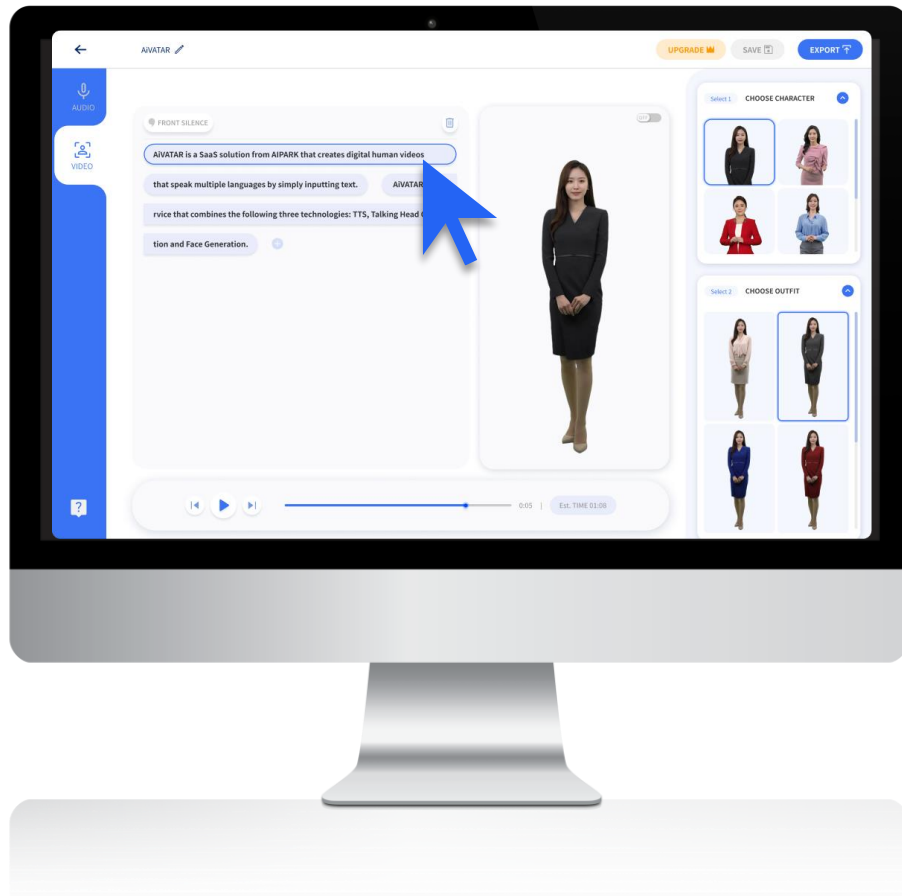

Flexible expression

Using our self-developed artificial intelligence voice and image synthesis algorithm, any voice can be adapted to fit the mouth shape of any language.

AiVATAR Dashboard 01

Dashboards that are **easy to create for anyone.**

The **intuitive UI** makes it easy to select options for producing avatar videos.

The **more options and languages** available, **the easier the task.**

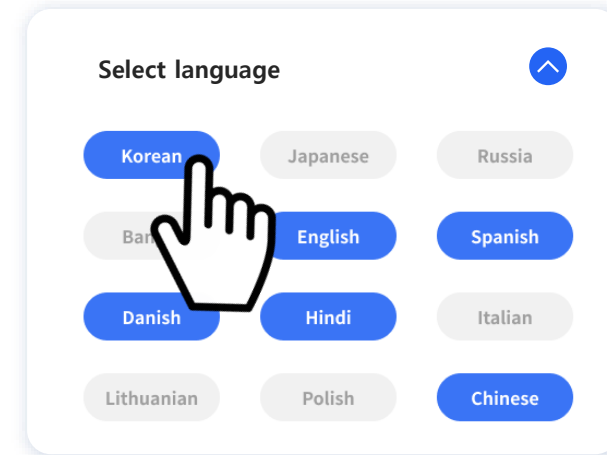

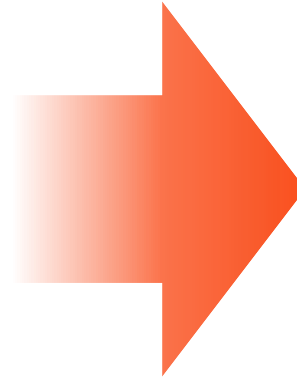

Select the desired characters and utilize them as avatars.

Dashboards that are **easy to create for anyone.**

Can a video be created
with the same moderator
in six different languages?
