Who are we?

STCLab Inc. is a startup, headquartered in Gangnam, South Korea — on a mission to provide **reliable online traffic management** for clients to have control of infrastructure/server costs, reduce downtime and further add value in enhancing their customer experience. The “STC” stands for “Surfing The Wave of Change” meaning only those who are prepared for the Wave of Change can surf and enjoy.

Traffic & Resource Management

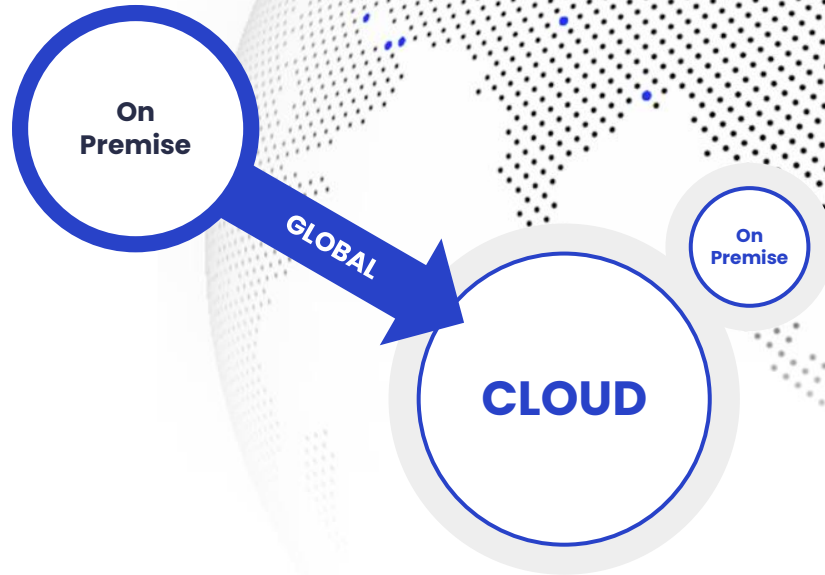

A Solution for Seamless Service and Cost Efficiency

Next Growth – Global Expansion

Supporting over 450 industry leaders in South Korea, NetFUNNEL has a strong market domination. If you see a waiting page while in South Korea, 97% chance its powered by NetFUNNEL.

STCLab's mission is to provide solutions for traffic management and infrastructure cost optimization so companies can focus on their main business and prepare to surf the Wave of Change together.

Solutions Roadmap

STCLab Inc. is currently bolstering its market presence with a primary focus on **NetFUNNEL (Virtual Waiting Room Service)**. We're also proactively addressing the growing demand in the **FinOps sector** by developing a range of traffic management and infrastructure management products that synergize with the NetFUNNEL service
